

GENERAL INFORMATION

Plan Report ID Number: 20231031alp

Developer Name: Alpha II, LLC

Product Name(s): MIPS Accelerator

Version Number(s): 6

Certified Health IT Product List (CHPL) Product Number(s): 15.02.05.1598.HEAL.01.03.0.220117

Developer Real World Testing Results Report Page URL <https://www.alphaii.com/mips-certification>

CHANGES TO ORIGINAL PLAN

The MIPS Accelerator was tested with CMS IG 2024. The product was updated to that version to keep up to date with the most recent standards through the SVAP process. This did not have any impact to the MIPS Accelerator 2024 Real World Testing results.

WITHDRAWN PRODUCTS

Product Name(s):	Not Applicable
------------------	----------------

SUMMARY OF TESTING METHODS AND KEY FINDINGS

Alpha II' MIPS Accelerator is certified to ingest patient data, calculate all relevant electronic Clinical Quality Measures, and to export the data required to comply with programs such as MIPS, PCF, and APM reporting regardless of practice size, specialty, or Care Setting. The focus of Alpha II' Real World Test plan and measures were to track and document the relevant interoperability criteria and adherence to the relevant criteria Alpha II is certified for. Alpha II developed multiple measures designed specifically to track performance relevant to interoperability including ingesting data from 3rd party EHRs and exporting patient data in accordance with the ONC certification standards. Additionally, availability of this functionality and success in submitting data to CMS are indicators of interoperability functioning as it is designed to.

Alpha II implemented functionality to track these statistics over the course of a full calendar year versus a limited timeframe. Measures specific to the import and export of patient level data were calculated based upon every patient imported and exported from Alpha II' MIPS Accelerator. Dashboard Update and Successful Data File Creation were calculated based upon each instance occurring during the calendar year.

STANDARDS UPDATES (INCLUDING STANDARDS VERSION ADVANCEMENT PROCESS (SVAP) AND UNITED STATES CORE DATA FOR INTEROPERABILITY (USCDI))

- ☒ Yes, I have products certified with voluntary SVAP or USCDI standards. (If yes, please complete the table below.)
- ☐ No, none of my products include these voluntary standards.

Standard (and version)	170.205(h)(3) 2024 2024 CMS QRDA I Implementation Guide for Hospital Quality Reporting (Updated August 2023) and 170.205(k)(3) 2024 CMS QRDA III Implementation Guide for Eligible Clinicians (Updated November 2023)
Updated certification criteria and associated product	MIPS Accelerator 6 170.315(c)(3)
CHPL Product Number	15.02.05.1598.HEAL.01.03.0.220117
Conformance measure	Time Available and Successful Data File Creation Real World Testing Measures
Standard (and version)	170.205(h)(2) "HL7 CDA® R2 Implementation Guide: Quality Reporting Document Architecture - Category I (QRDA I); Release 1, DSTU Release 5.3 with errata (US Realm), Volume 1 - Introductory Material, December 2022
Updated certification criteria and associated product	MIPS Accelerator 6 170.315(c)(1)
CHPL Product Number	15.02.05.1598.HEAL.01.03.0.220117
Conformance measure	Export Error Rate and Import Error Rate
Standard (and version)	170.205(h)(2) "HL7 CDA® R2 Implementation Guide: Quality Reporting Document Architecture - Category I (QRDA I); Release 1, DSTU Release 5.3 with errata (US Realm), Volume 1 - Introductory Material, December 2022"
Updated certification criteria and associated product	MIPS Accelerator 6 170.315(c)(2)
CHPL Product Number	15.02.05.1598.HEAL.01.03.0.220117
Conformance measure	Dashboard Update Rate and Time Available

Care Setting(s)

Care Setting	Justification
All Care Settings	Alpha II's MIPS Accelerator functioned the same regardless of Care Setting. Real World Testing metrics were tracked and calculated across all users of the software regardless of size, specialty, or Care Setting. This methodology ensured the software's adherence to the certified interoperability criteria regardless of how it was implemented in the healthcare market.

Metrics and Outcomes

Measurement /Metric	Associated Criterion(a)	Relied Upon Software (if applicable)	Outcomes	Challenges Encountered (if applicable)
Import Error Rate	170.315(c)(1)		96.69%	3 rd Party EHR Conformance to the QRDA Implementation Guide
Export Error Rate	170.315(c)(1)		100%	
Time Available	170.315(c)(2) & 170.315(c)(3)		100%	
Dashboard Update Rate	170.315(c)(2)		100%	
Successful Data File Creation	170.315(c)(3)		100%	

The above measures and associated results demonstrate that Alpha II's MIPS Accelerator operates as it is certified to for the ingestion of patient data, calculation of all relevant electronic Clinical Quality Measures, and the export of data required to comply with programs such as MIPS, PCF, and APM reporting regardless of practice size, specialty, or Care Setting.

KEY MILESTONES

Key Milestone	Care Setting	Date/Timeframe
Real World Testing plan - developed for publication of the Real World Testing plan, including working with ONC-ACB to finalize and publish approved plan	All	09/01/2023 - 12/15/2023
Verified functionality related to the previously developed tracking of approved Real World Testing plan metrics and implemented any adjustments as necessary	All	10/15/2023 - 12/31/2023

Measure data collection occurred	All	01/01/2024 - 12/31/2024
Quarterly review of data collected occurred – periodic reviews of the performance on the measures were completed as planned.	All	Quarterly, 2024
Real World Testing final 2024 data analysis, documentation, and submission of report to ONC-ACB	All	01/01/2025 - 01/15/2025
